Lead-to-Support Automation

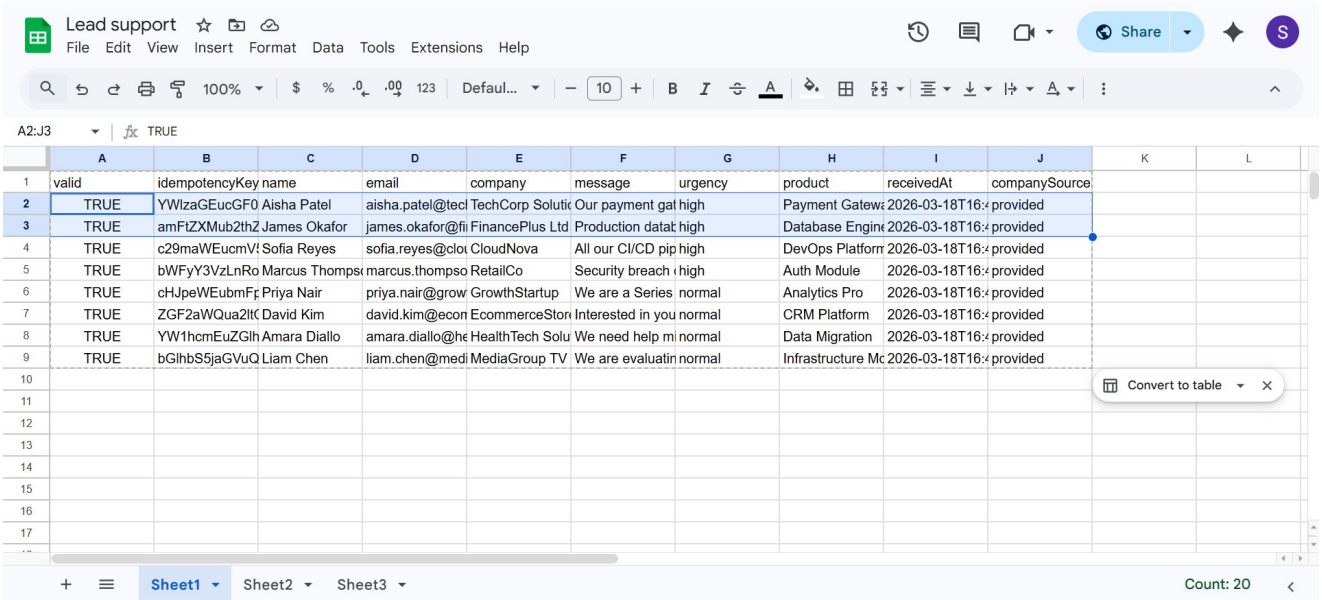
n8n Workflow — Execution Output Report

Integrations: Gmail · Google Sheets · Slack · Trello · n8n Webhook

1. Successful Normal Urgency Path

Google Sheets — Leads Stored (Sheet1)

All valid leads are stored in Sheet1 with all columns correctly populated including name, email, company, urgency, product, and timestamp.



valid	idempotencyKey	name	email	company	message	urgency	product	receivedAt	companySource

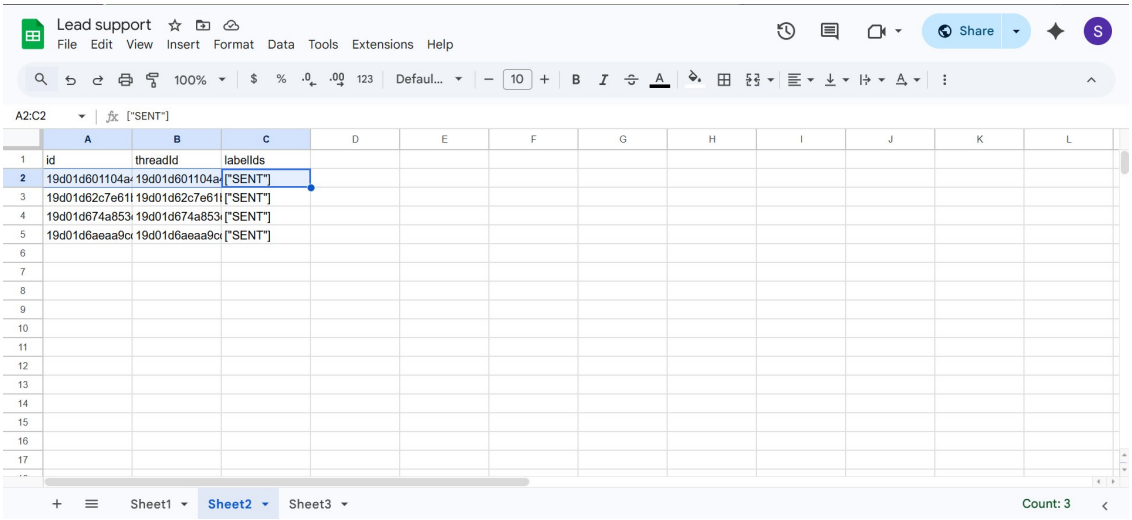
Sheet1 — valid leads stored with all columns: name, email, company, urgency, product, receivedAt

Google Sheets — Confirmation Emails Logged (Sheet2)

Sheet2 logs the Gmail message ID and thread ID for every confirmation email sent, confirming successful delivery.



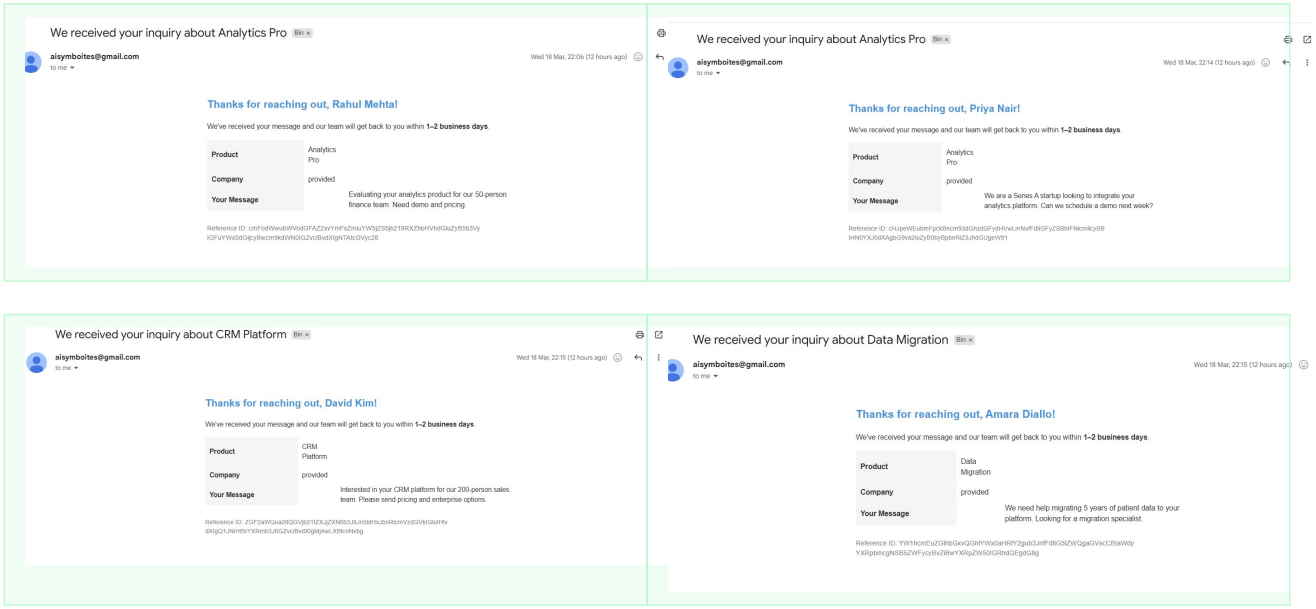
id	threadId	labelIds
19d01d601104a	19d01d601104a	["SENT"]
19d01d62c7e61	19d01d62c7e61	["SENT"]
19d01d674a853	19d01d674a853	["SENT"]
19d01d6aeaa9c	19d01d6aeaa9c	["SENT"]

Sheet2 — email log showing Gmail thread IDs with labelIds: [SENT]

1. Normal Urgency — Confirmation Emails Sent

Confirmation Emails — Received by Leads

Each normal urgency lead receives a personalised HTML confirmation email with their product, company, and message details. All 4 emails shown below were successfully delivered.

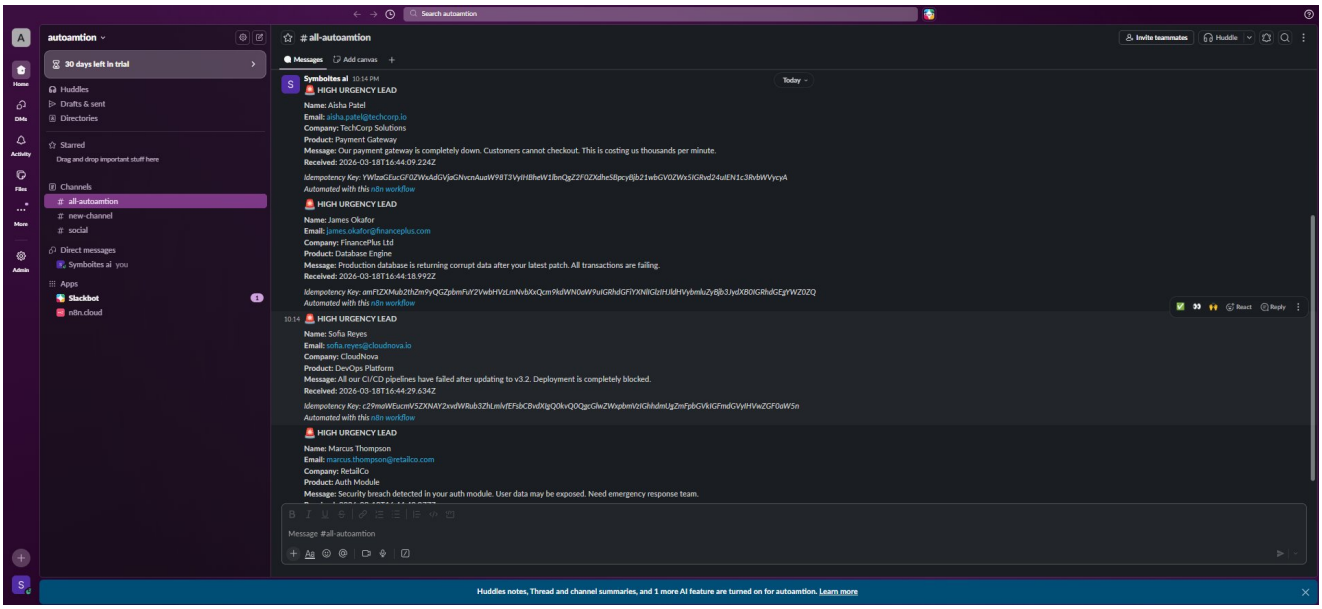


All 4 confirmation emails delivered successfully — personalised with lead name, product, and message details

2. Successful High Urgency Path

Slack Alert — #all-autoamtion Channel

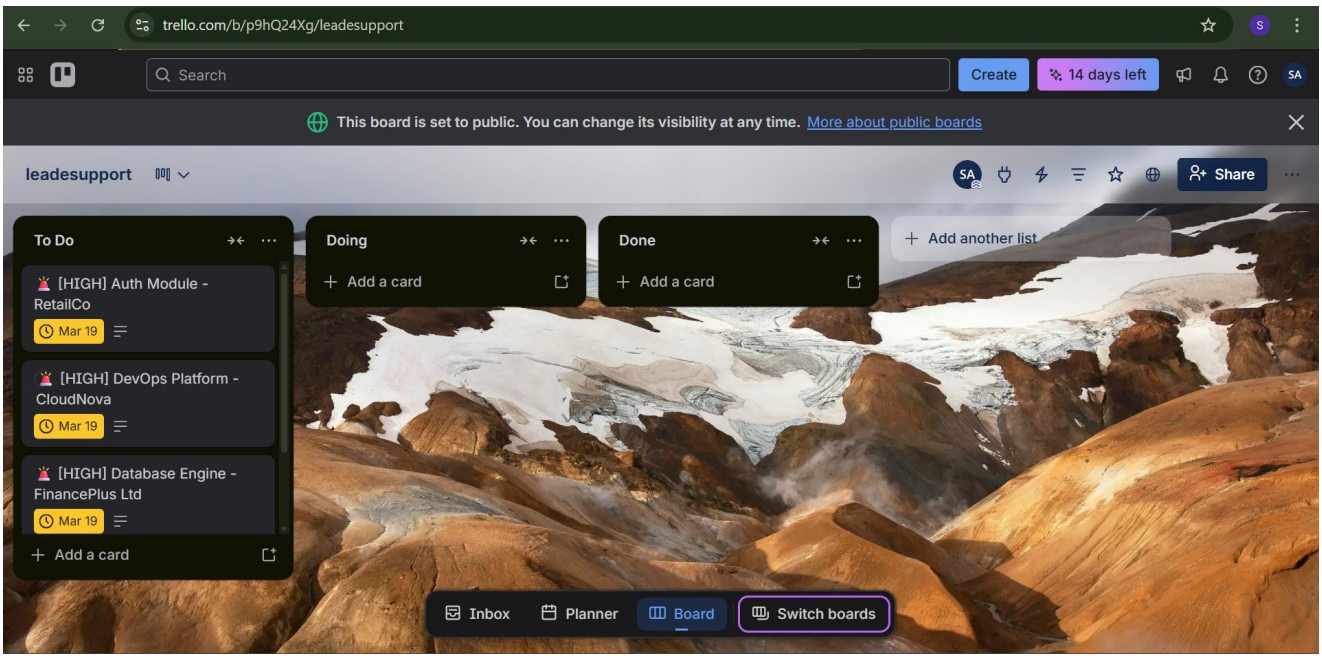
When urgency is 'high', the workflow immediately posts a detailed alert to the Slack channel with the lead's full details.



Slack #all-autoamtion — high urgency alerts received in real time

Trello Board — Cards Created in 'To Do'

Simultaneously a Trello card is created in the 'To Do' list with full lead details and a due date set to the next day.

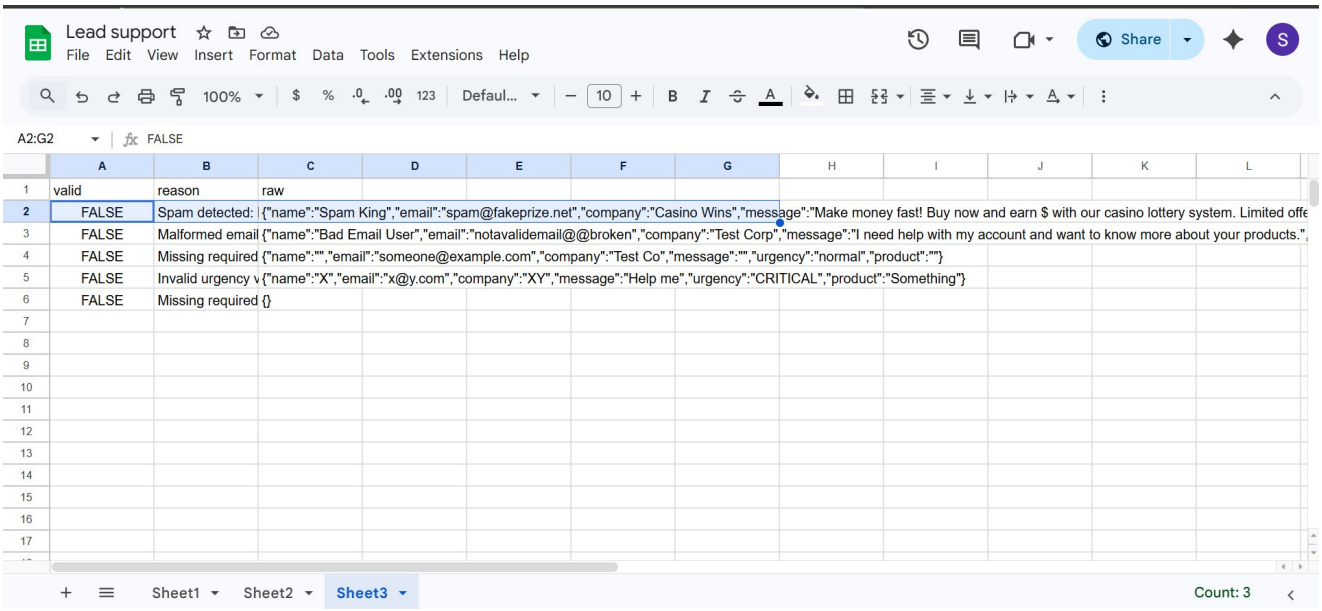


Trello board — leadesupport — high urgency cards auto-created in 'To Do'

3. Failure Path — Dead Letter Queue

Google Sheets — Dead Letter Sheet (Sheet3)

Invalid or spam payloads are rejected with a 422 response and written to Sheet3 with the exact failure reason and original raw payload.



valid	reason	raw
FALSE	Spam detected:	{"name":"Spam King","email":"spam@fakeprize.net","company":"Casino Wins","message":"Make money fast! Buy now and earn $ with our casino lottery system. Limited offe
FALSE	Malformed email	{"name":"Bad Email User","email":"notavalidemail@@broken","company":"Test Corp","message":"I need help with my account and want to know more about your products.",
FALSE	Missing required	{"name":"","email":"someone@example.com","company":"Test Co","message":"","urgency":"normal","product":""}
FALSE	Invalid urgency v	{"name":"X","email":"x@y.com","company":"XY","message":"Help me","urgency":"CRITICAL","product":"Something"}
FALSE	Missing required	{}

Sheet3 — dead letter queue: spam detection, malformed email, missing fields, invalid urgency

Failure Cases Handled

Failure Type	Reason	Response
Spam keywords	Spam detected: keyword "casino"	422
Malformed email	Malformed email: notavalidemail@@broken	422
Missing fields	Missing required fields: name, message, product	422
Invalid urgency	Invalid urgency value: "CRITICAL"	422
Empty payload	Missing required fields: name, email, message, product	422

4. Daily Digest Email — 6 PM Scheduled Execution

Daily Lead Digest Email

Every day at 6:00 PM the workflow reads all leads from Sheet1, aggregates counts by urgency and product, identifies the top 5 most recent leads, and sends a formatted HTML digest email.

📊 **Daily Lead Digest — 2026-03-19 (8 leads)**
